

Practical - 1

Practical Title: Project Initiation, Requirement Analysis, Sitemap, Wireframe, and GitHub Setup

Problem Definition: Initiate the semester-long StudentHub portal by identifying the problem scope, user roles, key modules, navigation flow, and minimum 10 pages. Create a sitemap, low-fidelity wireframe, project folder structure, README file, and GitHub repository.

A. Theory

1. What is URL and parts of URL?

Answer: A **URL** is the address of a webpage or any file on the Internet. It helps the browser find and open the required webpage.

EX. [https:// www.google.com](https://www.google.com)

2. How does HTML file process in web browser?

Answer: When we enter a website address or open an HTML file, the web browser first reads the HTML code. It understands the tags and creates the structure of the webpage. Then it loads the CSS to apply colors, fonts, and layout, and runs JavaScript to make the page interactive. Finally, the browser displays the complete webpage on the screen.

3. How will page navigation flow managed among all HTML pages?

Answer: Page navigation is managed by using **hyperlinks (<a> tags)** in HTML. Each page contains links that connect it to other pages of the website. When We clicks a link, the browser opens the corresponding HTML page. Navigation menus, buttons, and links help users move from one page to another easily.

4. How will GitHub commits be maintained after each practical?

Answer: After completing each practical, I will save all the updated files and commit the changes to my GitHub repository. Every commit will have a clear message describing what was done in that practical. Then I will push the commit to GitHub so that all changes are stored online and the progress of each practical is maintained.

B. Output:-

Requirement Analysis:-

- User Login and Registration
- Student Dashboard
- Profile Management
- Attendance Tracking
- Assignment Details
- Course Information
- Result Viewing
- Notices and Events
- Contact/Feedback
- Easy Navigation and Secure Login

SiteMap:-

STUDENT HUB PORTAL

Wireframe:-

I'll put their photo in Evidence for all 10 pages.

C. Evidence of Work (Screenshots)

1.Index Page:-

2.Login Page:-

3.Registration Page:-

The registration form is displayed on a dark background. At the top center, there is a white rectangular button labeled "Register". Below this, the form consists of several white rounded rectangular input fields arranged in two columns. The left column contains six fields: "Full Name", "Enrollment ID", "Contact Number", "Address", "Batch", and "Nationality". The right column contains three fields: "Date of Birth", "Branch", and "Mother Tongue". At the bottom right of the form, there is a white oval button labeled "Register".

Registration Form Fields	
Full Name	
Enrollment ID	Date of Birth
Contact Number	Branch
Address	
Batch	Mother Tongue
Nationality	

4.Profile Page:-

The image shows a dark-themed user profile page. At the top center is a white rectangular box labeled "Profile". To its right is an oval button labeled "Edit". Below the "Profile" box, there are two columns of input fields. The left column contains: "Full Name", "Enrollment ID", "Contact Number", "Address", "Batch", and "Nationality". The right column contains: "Date of Birth", "Branch", and "Mother Tongue". At the bottom right of the form is an oval button labeled "Save".

5. Dashboard Page:-

6.Assignment Page:-

The image shows a UI mockup for an 'Assignment' page. It features a dark blue background. At the top center is a white rectangular box labeled 'Assignment'. To its right is a white icon of a document with a folded corner. On the left side, there are three white chevron-shaped buttons pointing right, labeled 'Subject', 'Question Paper', and 'Upload Assignment'. At the bottom right is a white oval button labeled 'Save'.

7.Attendance Page:-

8.Course Info page :-

The image shows a form titled "Course Information" with a dark background. The form contains several input fields for user data. At the top is a header box with the title. Below it are two rows of two fields each: "Name" and "Enrollment Id" in the first row, and "Course Name" and "Semester" in the second row. The third row has three larger fields: "Subject Name", "Credit", and "Syllabus". At the bottom is a single field labeled "Any Queries".

Course Information		
Name	Enrollment Id	
Course Name	Semester	
Subject Name	Credit	Syllabus
Any Queries		

9.Result Page:-

A screenshot of a web form titled "Result" on a dark blue background. The form contains four white input fields stacked vertically: "Semester", "Enrollment ID", and "CGPA". A white oval button labeled "Download" is positioned at the bottom right of the form.

Result	
Semester	
Enrollment ID	
CGPA	
Download

D. GitHub Repository Link:

<https://github.com/krish-301/Student-Hub-Portal>

E. Challenges Faced:

Like Where to Which type of Content like text,image ,Navigation bar.
Also Confused about a Navigation to One page to another page.

F. Learning Outcomes:

I Learn How to start Make Any Website Like What We do First. It Was make it clear about base foundation of any website.

G. Faculty Remarks:
