

## Practical – 2: Semantic HTML5 Pages with Accessibility-Ready Structure

**Practical Title:** Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly structure.

### Theory

1. Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

**Answer:** Yes, I used semantic tags properly to organize the webpage and make the structure easy to understand.

2. Are form labels, headings, image alt text, and navigation links accessible?

**Answer:** Yes, form labels, headings, alt text, and navigation links are used properly so users can easily understand and use the website..

3. Is the page structure consistent across all pages?

**Answer:** Yes, the page structure is consistent across all pages. The header, navigation bar, content area, and footer follow the same style

.

Output:-

### 1.Home Page :-

### GitHub Repository Link:

<https://github.com/krish-301/Student-Hub-Portal>

### Challenges Faced:

- I found it difficult to understand where to use **semantic tags** like <header>, <nav>, <main>, <section>, and <footer>.
- Creating and linking **10 different HTML pages** was a little confusing at first.
- I faced some problems while making the **navigation menu links** work correctly between pages.
- I had to make sure that **form labels, headings, and image alt text** were added properly for accessibility.
- Maintaining the **same page structure and design** on all pages was challenging.
- I also faced some difficulty in checking whether the HTML structure was **proper and easy to understand**.

**Learning Outcomes:**

I learned how to:

1. Create HTML5 pages using semantic tags.
2. Create and link multiple web pages using navigation links.
3. Use forms, headings, labels, and images properly.
4. Follow basic accessibility rules like using alt text.
5. Maintain a consistent structure across all pages.
6. Create a basic breadcrumb navigation.
7. Build a clean and simple StudentHub website structure.

**Faculty Remarks:**
