Practical-12

Event Management CRUD with Poster Upload and File Validation

Theory

1. . Are add, update, and delete functionalities implemented correctly?

Answer: Yes, events can be added, updated, viewed, and deleted.

2. Is the UI linked with the database correctly?

Answer: Yes, the interface is connected to MySQL using PHP.

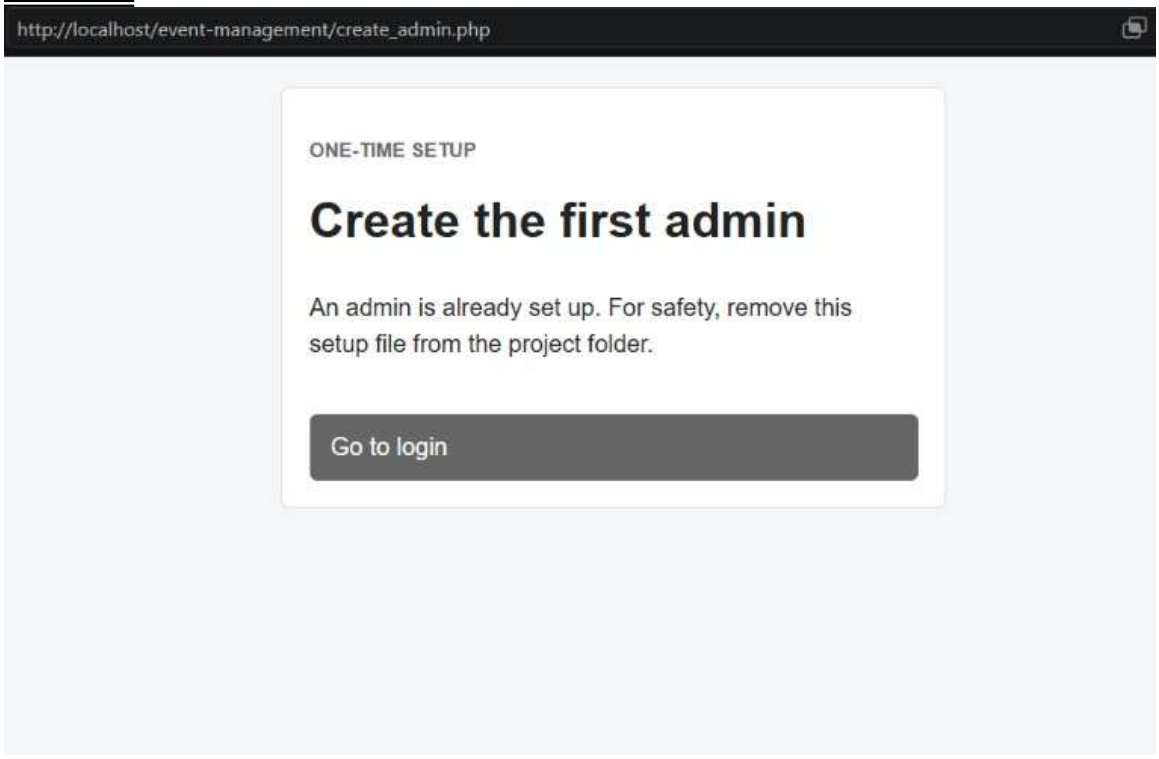

3. Are poster uploads validated for type and size?

Answer: Yes, poster file types and sizes are checked before uploading.

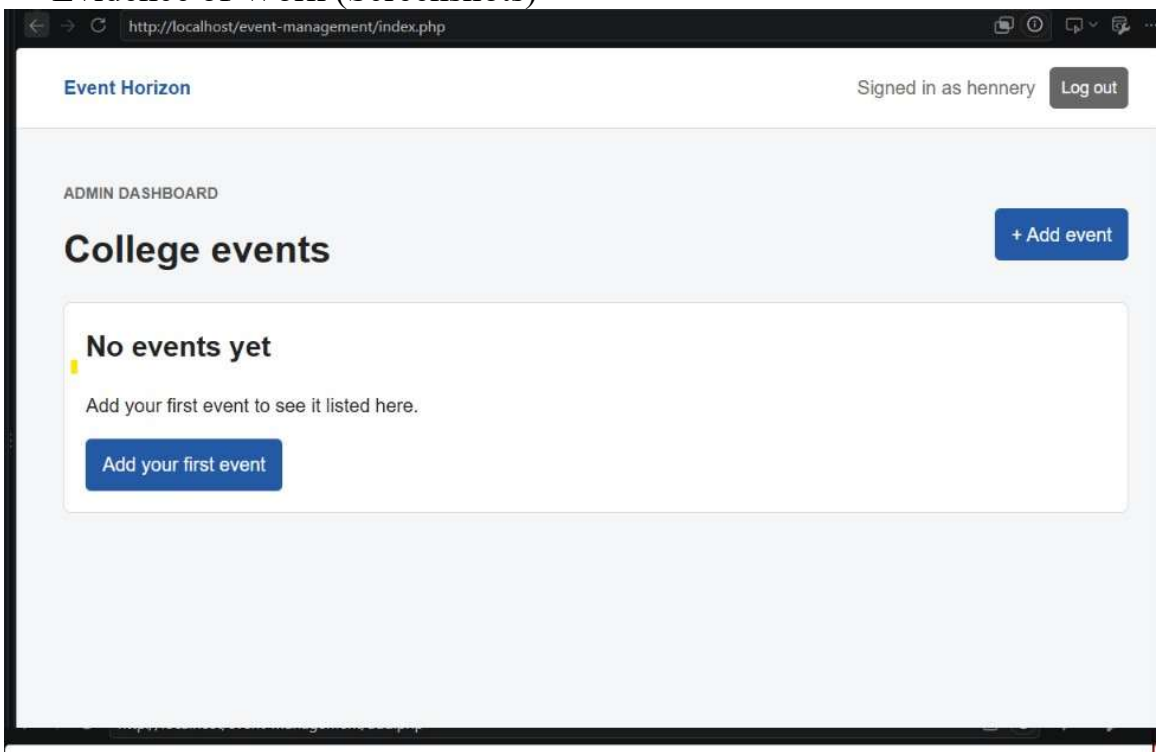

4. Are success and failure messages displayed?

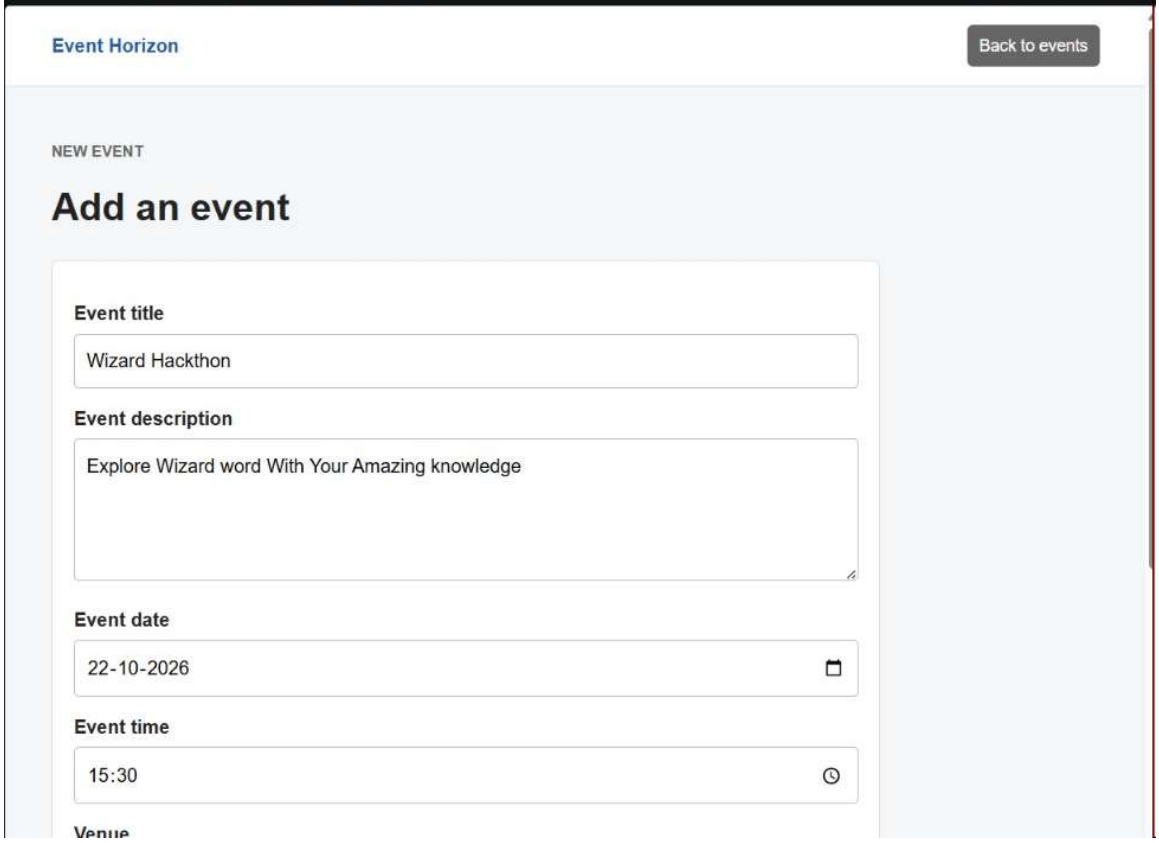

Answer :- Yes, success and error messages are displayed after each operation.

B. Challenges Faced:

I faced some difficulties in connecting the event management form with the MySQL database and implementing add, update, and delete operations. I also faced challenges in validating poster file types and sizes and displaying proper success and error messages.

C.Learning Outcome:-

I learned how to perform CRUD operations for event management using PHP and MySQL. I also learned to upload posters with file type and size validation, connect the user interface to the database, and display appropriate messages after each operation.
